

ICANN Activity To January 26, 2015

At-Large Ad-Hoc WG on the Transition of US Government Stewardship of the IANA Function

- Discussion of the Names Community Proposal and At-Large's response to it.
 - Discussions are on-going and the Names proposal has evolved
- The Numbers and Protocols communities have presented their proposals.
 - These were fairly simple proposals because the two communities do not see very much change taking place, particularly in their relationship with ICANN

Technology Task Force

- Evaluation of conferencing tools has, indeed, wrapped and a report will be submitted in the upcoming meeting in Singapore.
- Task Force members being encouraged to look out for tools, particularly mobile tools, that the community in general will find useful, especially for attending meetings. Examples:
 - Google Translate, which has now included a number of new features
 - City Mapper
- Continuation of efforts to find solutions to the Policy Management problem, which includes, among other things:
 - clear presentation of the policy under consideration and supporting documentation
 - improvement of the effectiveness of all ICANN volunteer communities (perhaps by giving more time to comment)
 - create a better organization of information so information can be found
 - other measures having to do with metrics, involvement of new members and cross-community activity.

Registration Issues

No recent activity

North America Region At Large Organization (NARALO)

- An MOU will be signed with ARIN in Singapore. This is a mutual cooperation agreement.

Action Items

- Continue to watch At-Large's ongoing contribution to the IANA Stewardship Transition.
- For the Technology Task Force:
 - continue to contribute to a list of known difficulties for the Policy Management problem,
 - review available Android (especially) tools that might be useful.
