

Report on ICANN Activity for September 26August 22, 2016

IANA Issues (Formerly “At-Large Ad-Hoc WG on the Transition of US Government Stewardship of the IANA Function”)

No real activity. The AtLarge working group is re-starting its meetings to follow the post-transition things we need to do.

Technology TaskForce

There was a review of current issues with Adobe Connect. There is a report that ICANN will host Adobe Connect as a third party.

We've been asked to have a look at the new Flash Player for Linux and its use for Adobe Connect. Will do that sometime in October

WHOIS - Registration Data Base

ICANN 57 and the North Americal Region General Assembly

No actvitiy on either of these

New Intitatives

A review of the NARALO Operating Principles and rules of procedure is being launched. I will take part in this.

A Policy Development Initiative is being launched as well - my name is submitted for it..

And finally, the process of finding a new At-Large Director for the ICANN Board has launched, and I'm an “alternate” on one of the two committees on that effort

Overall

Nail-biting until the end of the week, when the “IANA transition” is supposed to take place.
