

## Report on ICANN Activity for October 2017

### ICANN60

This ICANN Annual General Meeting will take place from October 28 to November 3 in Abu Dabhi.

Evan will attend in person and Gordon will attend remotely.

### ICANN Evolution

Awaiting the ICANN 60 meeting in October.

### WHOIS/"Registrant Data System"

There was a webinar on this topic. There has been some progress. The work Policy Development group has launched an effort to document the known needs for each of the entries in the current WHOIS. There has already been some discussion of dropping one entry - the first registration date.

There will be further development on this during ICANN 60.

### Continuing Work on "ICANN Evolution"

There will be further development on this during ICANN 60.

### Technology Task Force

A status report will be presented during ICANN60.

### North American At-Large

No further development on the "hot topics" working group.

### Errata

There was an error in last month's report. An observation about discussions on the "justiction" issue should have appeared under a separate heading - ICANN Evolution.
