

Report on ICANN Activity for August 2017

ICANN Evolution

Some issues are still outstanding, so the effort is ongoing.

Most, if not all, of this should be complete by the ICANN 60 meeting in October.

ATLAS III

ATLAS II was the meeting Scott attended in London. This is a F2F attended by representatives from At-Large "Structures" world-wide.

Planning for ATLAS III continues. Where and when is not known at this time, but it is likely to be in Montreal in November, 2019. No news at this point.

WHOIS/"Registrant Data System"

A Policy Development Process is ongoing – spurred on by the EU enacting new privacy legislation with BIG penalties.

At-Large Review

At-Large response is still under draft. The draft went was reviewed by a general At-Large . This response, which contains implementation plans for some improvements (such as outreach), will be presented to the Board for review in September and then formally presented in the October meeting.

I listened to the ALAC (At-Large Executive) meeting on this. The commentary suggested that the external reviewers had pre-conceived notions of how At-Large should be run, and did not seem to take proper note of the information they were given in their meetings with ALAC members.

North American At-Large

Completed the process of selecting a delegate to sit in for another who cannot make the Abu Dhabi meeting.

The new Rules of Procedure was presented. And debated. This is close to a final draft.
