Report on ICANN Activity for October 24, 2016

IANA Issues (Formerly "At-Large Ad-Hoc WG on the Transition of US Government Stewardship of the IANA Function")

The transition of IANA happened, on schedule, at midnight, September 30.

This group has changed its name again, in response to the fact that IANA iself hsa been renamed (to Public Technical Identifiers – and I don't know, either). The new name of the group is "ICANN Evolution"

As part of the transition planning, there were a number of tasks that were deferred to after the transtion occurred – these were not part of the "mechanics" of ICANN management and accountability that had to be resolved before the transition.

This stream of work has now launched and a number of drafting team workgroups that have started to carry out this work.   The ICANN Evolution group will follow and comment on their reports on behalf of At-Large.

The names of the work-groups and their remits are described in an attachement to this document.

Technology TaskForce

I was not able to attend the meeting this month – so no report

WHOIS – Registration Data Base

ICANN 57 and the North Americal Region General Assembly
